

BabyCat Coin Whitepaper

Introduction

A meme stock is a share of a company that quickly jumps in price and becomes overvalued relative to its fundamentals because of increasing attention among the online community and social media platforms. The meme stock or meme token has in the recent time received relatively a tremendous media attention and adoption. These are cryptocurrencies that became popular among retail investors because of high endorsements by online social media influence and affluence.

On the other hand, meme coin is a cryptocurrency that is associated with an internet joke or pop culture reference (in most cases resonates attributes of pets like dog, cats, rabbits etc or most times represents a living attribute or character). The first meme coin, Dogecoin was created in December 2013. The coin pairs the Shiba Inu dog Kabusu with colourful fonts and childlike languages. Recently, the two largest meme coins in terms of market capitalization are Dogecoin and Shiba Inu.

With unbeatable use cases like the introduction of Non-Fungible Tokens (NFT), the Decentralized Finance (DeFi) and Decentralized Autonomous Organization (DAO) all geared towards real time ownership of digital unique asset, the disruption of finance intermediaries

and decentralized autonomy to native token owners respectively has boosted the acceptance and adoption of meme coins.

BabyCat Coin is the leading light of the next ground breaking meme token growth, capitalizing on giving real time attributes to our BabyCat Coin concept through a seamless innovation of augmented reality (AR), virtual reality (VR); through the most exhilarating sphere of Information Communication Technology – Artificial Intelligence (AI).

What is BabyCat Coin?

BabyCat Coin is a unique new meme-based token with a goal-oriented and detailed roadmap to take over the meme coin world. BabyCat Coin is a deflationary and revolutionary meme token, community-driven, with locked LP, low slippage, fully renounced token ownership and meme centric. BabyCat Coin is an Arbitrum token, fully audited with 40% Token burnt and posterity-focused.

BabyCat Coin vision is aimed at creating a real time BabyCat Coin Artificial Intelligence NFT unique trait and royalties. These NFTs are rare breeds of digital cats (pets) that will resonate with real-time cats owned by BabyCat Coin holders as pet and as such will be eligible to enjoy all voting right (DAO). BabyCat Coin holders will be rewarded with BabyCat Coin NFT (Community Reward/Airdrop), such that users can own, purchase and/or sell on a P2P platform.

Our token, BabyCat Coin is a meme token and deflationary token which makes it limited in supply but high in demand. This feature resonates with our vision to reward our community through a decentralized access to financial independence.

We are a community, retail investors, meme advocates and adopters; this is not just a cryptocurrency project we are creating a BabyCat Coin marketing community army for growth, sustainability, posterity and financial reward for everyone.

BCAT AI

BabyCat Coin Artificial Intelligence (AI) will be referred to as **BCAT AI**; a fun-loving, playful, affectionate, friendly and gentle pet. **BCAT** will grow through stages to metamorphose into a **BCAT AI**. These stages will replicate various series of decentralized community reward and financial opportunities for BabyCat Coin members and holders.

- **BCAT AI:** BabyCat Coin features a BCAT AI series. Here, members will be eligible through BabyCat Coin Artificial Intelligence (AI) to generate BabyCat Coin Meme with an AI technology inbuilt system. These memes will be used to compete in the BabyCat Coin Meme Challenge. BabyCat Coin DAO will have the right to vote BabyCat Coin meme challenge winners and these winners earn community rewards in BabyCat Coin. All BabyCat Coin holders are eligible to compete and earn daily rewards. These BabyCat Coin meme can be minted, purchased and/or sold as NFT collectibles on top P2P NFT platforms.
- **BCAT NFT:** This stage will feature the BabyCat Coin NFT. BCAT NFT is a real-time representation of BabyCat Coin collectibles, **BCAT NFT** will feature a multifaceted in-game protocol where users can game in a **CAT CLOWDER** through the Cat cluster, breed, battle and earn reward while interacting with other AI Cat Avatars. BabyCat Coin holders will be eligible to evenly participate and claim **BCAT NFT**.

BABYCAT COIN

BabyCat Coin is the utility token for the BabyCat Coin ecosystem. BabyCat Coin will serve as the fluid-in-ecosystem for the BabyCat Coin functionalities in real-time purchase of non-fungible asset and interaction with BCAT AI.

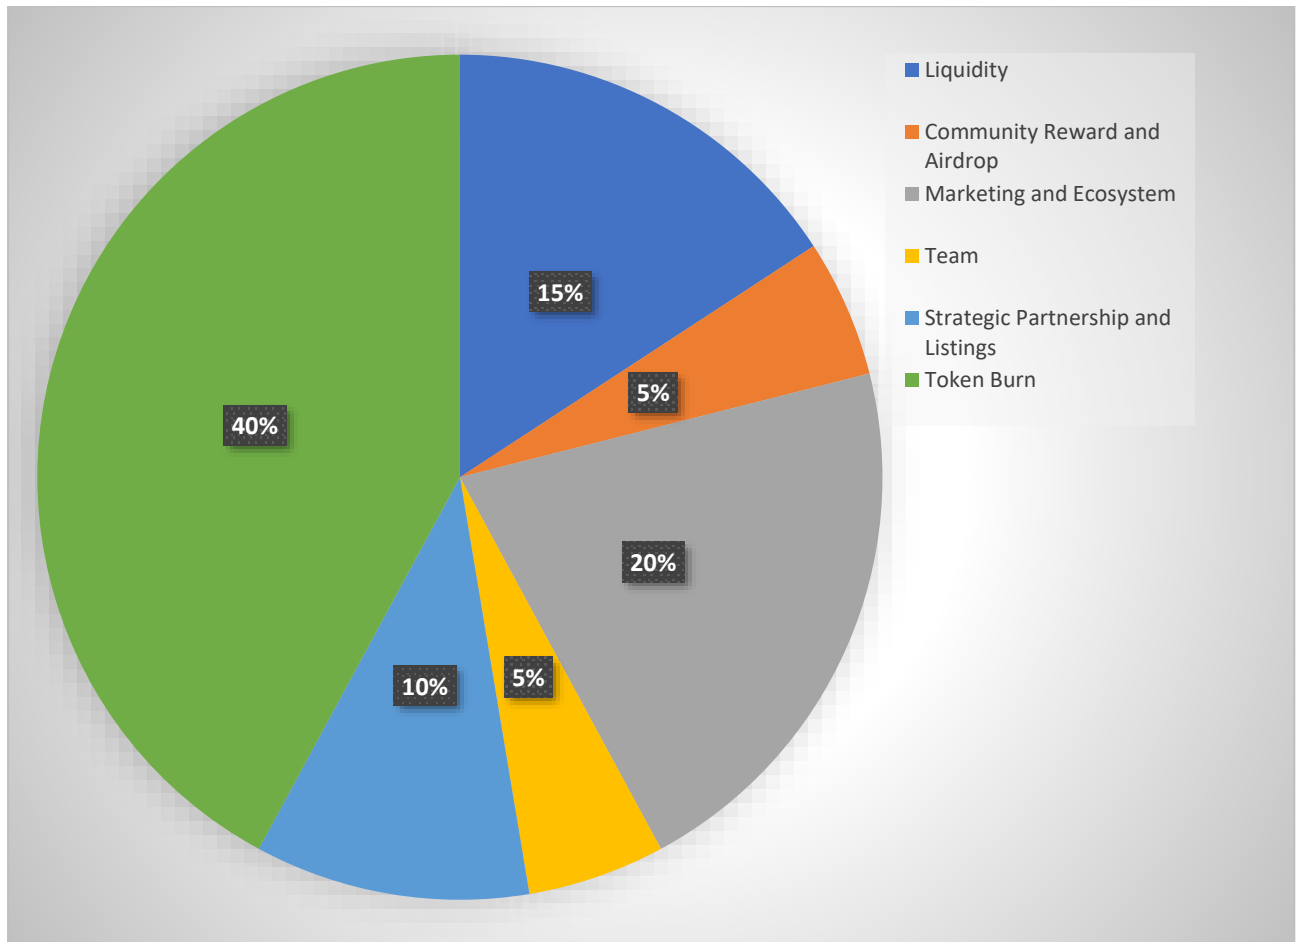

BabyCat Coin is a deflationary and revolutionary meme token, community-driven, with locked LP, low slippage, fully renounced token ownership and meme centric. In line with these features, BabyCat Coin is a highly secured and transparent asset built and regulated in Arbitrum all interaction with BabyCat Coin is trackable and accessible in the Arbitrum ecosystem.

BabyCat Coin has a Decentralized Autonomous Organization (DAO) feature that allows our native token early members the ownership and voting right in the BCAT AI challenge. As a community centred token, we are passionate about rewarding our community and token owners with numerous evenly distributed community rewards.

BabyCat Coin is a unique meme token, our vision is to create digital comforting companions for our users and allow them access these pets by owning our native tokens.

BabyCat Coin will be offered for Stealth launch to our community; this will be a way of rewarding our early users as stakeholders in owning the limited total Private Sale supply of BabyCat Coin.

TOKENOMICS

TOKEN DISTRIBUTION

The BabyCat Coin ecosystem approved the creation of the official project meme token, BabyCat Coin, with a total supply of 1,000,000,000 (one billion).

The current allocation consists of:

- 15% (150 Million) – BabyCat Coin Liquidity. Initial Liquidity will be provided in the market (Sushiswap) and made available to all contributors for purchase. This will be BabyCat Coin public sale of the total market supply of BabyCat Coin. Contributors who contribute during BabyCat Coin stealth launch will be rewarded concurrently in all BabyCat Coin Community and Ecosystem Rewards.
- 10% (100 Million) – BabyCat Coin for Community reward or airdrop. These tokens are subjected to the unlocking scheme.
- 20% (200 Million) – Allocated for BabyCat Coin project development, marketing round and ongoing BabyCat Coin projects.
- 5% (50 Million) – Team allocation to promote team growth and posterity and curtail team disintegration. These tokens must be placed on a strict transparent unlocking scheme.
- 40% (400 Million) – Token burn will help increase the value of BabyCat Coin.
- 10% (100 Million) - Strategic Partnership and listings with reputable cryptocurrency platforms, projects, influencers and individuals. All allocations here must be placed on a long-term unlocking scheme. Partnership Agreement announcement must be publicly announced and payment audited by BabyCat Coin Team and other boards with community appraisal.

BabyCat Coin Ecosystem

BabyCat Coin is a paradigm adoption and innovation of the meme coin projects. It is projected to interacting with members through Artificial Intelligence (AI) and Non-Fungible Token (NFT) as to achieve a direct user case between token contributors/holders and the BabyCat Coin Ecosystem. These interactions are poised to be of financial benefits and to users as BabyCat Coin will apply the DAO, POAP and Community reward incentives to boost token and project adoption.

Artificial Intelligence and Blockchain Technology plays an inclusive role for virtual aesthetics, technological development and decentralized autonomy for contributors. The automated generated BabyCat Coin Non-Fungible Tokens (NFTs) by BabyCat Coin Artificial Intelligence (AI) will allow users purchase, own and/or sell NFTs as well as reward the ecosystem through transaction fees during these interactions.

BabyCat Coin has allocated over 20% of BabyCat Coin to the development and growth of BabyCat Coin ecosystem. We are focused on ensuring a community centric project that rewards the community; a community which comprises of anyone who interacts with BabyCat Coin including the team.

BabyCat Coin Decentralized Autonomous Organization (DAO)

BabyCat Coin is determined to develop an ecosystem with a decentralized tokenized economy. BabyCat Coin DAO gives our contributors and members voting rights on every decision making regarding BabyCat Coin project development and growth.

BabyCat Coin DAO will allow its community members vote about what memes will get into the next NFT drop series, then for a period of time those NFTs can be minted by everyone.

Decentralized Autonomous Organization is an effective and safe way to work with like-minded folks around the world. Think of them like an internet-native business that is collectively owned and managed by its members. The blockchain technology and Smart Chain has proved a decentralized automated access to this transparency and autonomous decision-making, ensuring that the future of BabyCat Coin rests on the shoulders of its members.

The clear roadmap of BabyCat Coin is unadulterated, if the pathway of achieving this vision is walked by both the developers and its community, thus, our members (BabyCat Coin holders) are entitled to more privilege enjoyed in transparency by BabyCat Coin Team.

BabyCat Coin Treasury

BabyCat Coin treasury (investment fund) is a delicate module of the BabyCat Coin ecosystem, shelling a large part of funding for the development and actualization of BabyCat Coin clear roadmap.

Therefore, BabyCat Coin will explore these methodologies in tackling its DAO Treasury Management (DTM):

- **Diversification:** *Multisig wallets and Stablecoin treasury*

Most DAO treasuries are comprised predominantly of native tokens. This is a good move but highly risky approach; decreases in price of the native token can drastically influence the worth of the whole treasury. For some organization this could be destructive.

BabyCat Coin will employ the use of multisig wallet (digital wallets that require the use of at least two private keys for transaction approval, where each private key is held by a different DAO member). Thus, BabyCat Coin treasury funds are highly secured and locked into a smart contract, where every transaction must receive multiple levels of approval. Multisig wallets are highly recommended as they increase the security of DAO treasury management by ensuring that BabyCat Coin's funds are not controlled by a single member or wallet.

Upon token improved growth, BabyCat Coin DAO may vote to convert 30% of its treasury to stablecoin for token stability and to curtail market volatility with treasury.

- **Reporting:**

The lack of intermediaries and official authorities in DAO-related processes often leads to concerns about transparency and spending. Although a single person cannot make independent financial decisions without the approval of other members, regular reporting regarding investments and achieving results is a must to create trust and encourage more individuals to take part in the DAO.

Some of the essential information that should be presented through reporting includes long-term treasury strategies, the amount of Treasury stakes, the percentage gain, the length of the investment cycle, and others. Access to these insights will make decision-making easier and more efficient for DAO contributors.

BabyCat Coin Features

- **Stealth Launch**

With no preference or luck whatsoever, BabyCat Coin is available for everyone on Sushiswap.

- **Liquidity**

BabyCat Coin LP is currently totally locked ad infinitum. All contract ownership and access has been publicly renounced, as a community driven project we promote the decentralization of cryptocurrency.

- **Community Oriented**

BabyCat Coin is not focused on the numerical strength of community but on the uniqueness and engagement of our community. We are building organic, real and engaging community for greater reward. Our goal is simple, reward all our community members.

- **Low Slippage**

High 'buy and sell tax' is a recurring challenge for token acceptance and ownership. Thus, BabyCat Coin is one of the only meme tokens that has a low slippage. This will ease the withdrawal and deposit of BabyCat Coin for our community.

- **AI BabyCat Coin NFT**

BabyCat Coin pets will be represented in NFTs with focus Virtual Reality (VR) and Augmented Reality (AR) with clear vision of rewarding all BabyCat Coin holder with unique BabyCat Coin AI NFT.

ROADMAP

Phase One

- **BabyCat Coin Launch**
- **500 Holders**
- **2000 wallet Transactions**
- **Website Launch**
- **Contract Auditing by Certik and Solidity Finance**
- **1500 organic Telegram members**
- **Boosting of Asian and African Community**
- **Whitepaper Launch**
- **Roadmap Launch**

Phase Two

- **Coinmarketcap and Coingecko Listing**
- **6000 telegram members**
- **3000 holders**
- **Creation of Charity and Community Reward Wallet**
- **Listing on CEX**

Phase Three

- **20000 Telegram members**
- **10000 holders**
- **Marketing and Development**
- **Whitepaper Review**
- **Website Update**
- **AI NFT Development**

Phase Four

- **60000 Holders**
- **100000 Telegram members**
- **BabyCat Coin NFT Marketplace**
- **Partnership Announcement**

- **Roadmap Review**
- **Listing on CEX**
- **Project Review**

Phase Five

- **200000 Holders**
- **BabyCat Coin NFT Reward for all Holders**
- **Cryptocurrency Education and Awareness Funding**
- **Listing in top CEX**
- **\$100M Market Cap**
